The CAMLOG® Implant System

The CAMLOG® Implant System is based on years of clinical and laboratory experience and is a user-friendly, consistent prosthetically oriented Implant system.

All CAMLOG® Products are manufactured with the latest state-of-the-art technology. The CAMLOG® Implant System is continuously being developed by the company's research and development team in collaboration with clinics, universities and dental technicians and therefore stays abreast of the latest technology.

The CAMLOG® and CONELOG® Implant Systems are very well documented scientifically. Studies* support this with respect to a great many parameters including the Implant surface, time of implantation and/or Implant loading, primary stability, and the connection design. The long-term results of the Promote® Surface are convincing.

The descriptions that follow are not adequate to permit immediate use of the CAMLOG® Implant System.

Instruction by a surgeon experienced in using the system is strongly recommended. CAMLOG® Products should only be used by dentists, doctors, surgeons and dental technicians who have been trained in using the system. Appropriate courses and training sessions are regularly offered by Camlog.

Methodological errors in treatment can result in loss of the Implant and significant loss of peri-Implant bone.

Not all products and services from Camlog are available in all countries.

Packaging units: unless described otherwise, each pack contains one product.

The images in this document are for reference purposes only and may differ from the actual product.

* see «Further documentation» on page 125

CAMLOG® PROGRESSIVE-LINE Implants

The new CAMLOG® PROGRESSIVE-LINE Implants make it easier to implement modern treatment concepts such as immediate restorations or immediate loading, which require high primary stability.
The geometry of the Implant is consistently designed to develop high initial stability:

- The self-tapping screw Implant has a conically shaped apical area that enables pronounced primary stability even in soft bone.
- Thread extending to the apex for good anchorage in immediate implantations.
- Parallel-walled area of the Implant body for greater flexibility of the vertical position.
- Crestal thread for improved hold with limited bone height.

The CAMLOG® PROGRESSIVE-LINE Implants are available with the Promote® plus surface which features a 0.4 mm high machined Implant neck. Depending on the clinical situation, this surface design thus permits slightly supracrestal or epicrestal Implant positioning.

PROGRESSIVE-LINE Implants with screw-mounted insertion post can be used for the guided implantation.

CAMLOG® PROGRESSIVE-LINE Implants are equipped with the proven Tube-in-Tube® Implant-abutment connection and feature three symmetrically arranged angular grooves in the cylindrical part of the Implant neck. The prosthetic restoration is performed with CAMLOG® Abutments, optionally also with components for Platform Switching.

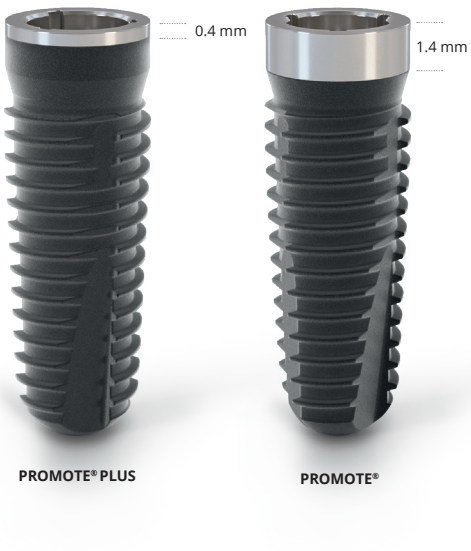
Implant diameters

3.3 mm | 3.8 mm | 4.3 mm | 5.0 mm

Implant lengths

9 mm | 11 mm | 13 mm | 16 mm

CAMLOG® SCREW-LINE Implants



CAMLOG® SCREW-LINE Implants are slightly conical, self-tapping screw Implants. They enable easy insertion by self-centering with continuous bone contact to achieve solid primary stability.
SCREW-LINE Implants are available with both the Promote® Surface (1.4 mm machined Implant neck section) and the Promote® plus surface (0.4 mm machined Implant neck section) and thus allow maximum flexibility of the vertical Implant position. Rounding of the apical geometry ensures gentle insertion of the SCREW-LINE Implants into the bone, also near the maxillary sinus.

SCREW-LINE Implants with screw-mounted insertion post can be used for the guided implantation.

CAMLOG® SCREW-LINE Implants are equipped with the proven Tube-in-Tube® Implant-abutment connection and feature three symmetrically arranged angular grooves in the cylindrical part of the Implant neck. The prosthetic restoration is performed with CAMLOG® Abutments, optionally also with components for Platform Switching.

Implant diameters

3.3 mm | 3.8 mm | 4.3 mm | 5.0 mm | 6.0 mm

Implant lengths

9 mm | 11 mm | 13 mm | 16 mm

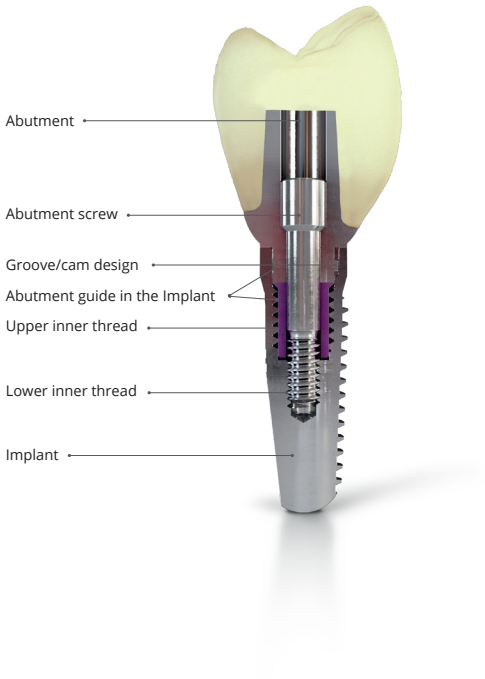
All CAMLOG® Implants are delivered pre-assembled in sterile packaging on a color-coded insertion post corresponding to the diameter.

The option of Platform Switching may only be used with CAMLOG® Implants with K article numbers.

CAMLOG® Tube-in-Tube® Implant-abutment connection

The unmistakable Tube-in-Tube principle with the three interlocking grooves and cams creates a very precise, stable, and antirotational implant-abutment connection. This was designed biomechanically on the basis of complex finite element analyses. It has proven itself millions of times over for many years and its long-term success has been scientifically documented.

The CAMLOG® Tube-in-Tube® Connection has undergone extensive scientific studies and achieved above average good results for tightness and precision fit.



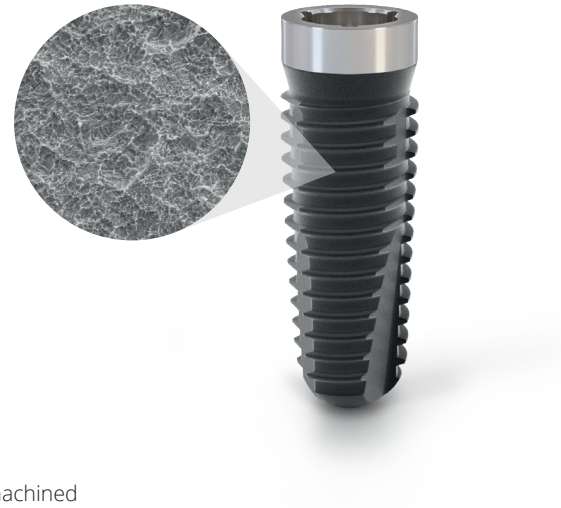
Advantages and benefits of the Tube-in-Tube® Connection

- Easy indexing thanks to three possible positions of the abutments
- Precise with excellent tactile feedback
- Platform Matching and optional Platform Switching
- Defined vertical stop: no height offset over the entire workflow
- Reduced diameter implant (Ø 3.3 mm)
- Scientifically documented long-term results

For optimal positioning of the abutments, the Implant should be aligned in the bone so that one of the three grooves points in vestibular direction. With the CAMLOG® Implants, the insertion tools include markings that correspond to the three grooves of the Implant inner configuration.

Promote® Surface

CAMLOG® Implants are available with the abrasive-blasted, acid-etched Promote® Surface. The surface is based on current scientific knowledge and supports rapid osseointegration. Scientific results from studies with cell cultures, osteohistology and in pull-out trials illustrate this impressively.



Production precision

The inner and outer geometry of the CAMLOG® Implants and abutments are rotary machined for the most part. The tolerances can therefore be kept very low. The result is excellent part precision without impacting the material structure. The Tube-in-Tube® Implant-abutment connection thus ensures a very precise, stable and rotation-locked connection to the prosthetic components.

CAMLOG® Prosthetic components

The CAMLOG® Implants can be provided with a wide range of flexible, anatomically adapted prosthetic components. CAMLOG® Abutments are color-coded according to the Implant diameters.

Effect of the Platform Switching design

Platform Switching is used to support the hard and soft tissue in the peri-Implant esthetic region. The distance between the Implant-abutment interface and the alveolar crest is increased and thereby reduces the effect of inflammatory cell infiltration with concomitant bone resorption. The option of Platform Switching may only be used with CAMLOG® Implants with K article numbers.

CAMLOG® Healing caps PS for Platform Switching

The CAMLOG® Healing caps PS (cylindrical, wide body, bottleneck) are tapered in diameter at the shoulder support making it possible to adapt soft tissue over the Implant shoulder.

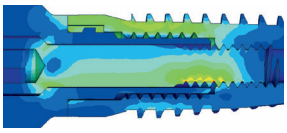
CAMLOG® Impression posts PS, open and closed tray for Platform Switching

Due to the adaptation of the soft tissue over the Implant shoulder, the use of the CAMLOG® Healing caps PS necessitates the use of the CAMLOG® Impression post PS for Platform Switching.

CAMLOG® Temporary abutments PS, CAMLOG® Esthomic® Abutments PS, CAMLOG® Titanium base CAD/CAM PS and CAMLOG® Universal abutments PS for Platform Switching

The CAMLOG® Abutments PS are also tapered in diameter in the area of the shoulder support and thus allow adapting soft tissue over the Implant shoulder during prosthetic restoration.

Short cam geometry



CAMLOG® Abutments with K article numbers

The abutments are extended apically in tubular shape (5.4 mm) and include three short cams in the upper section that correspond to the three grooves in the Implant.

When inserting the abutments, their tubular extension towards the apex affects the simple, easy and safe orientation in the longitudinal axis of the Implant before the three cams lock into the grooves of the Implant shoulder. The abutment is rotated until tactile engagement of the cams in the grooves of the Implant. The abutment is then in the final position.

The Implant-abutment connection of the CAMLOG® Implant System is predominantly a form-fitting connection. The connection with the cam geometry was optimally designed in terms of biomechanics by applying elaborate finite element analyses. The image displays the distribution of the von Mises tension in the Implant-abutment connection in accordance with ISO 14801 at a load of 200 N.

CAMLOG® Healing caps

The various healing caps are used according to indication for single and two-stage procedures. The CAMLOG® Healing caps are available in three geometries (cylindrical, wide body and bottleneck), both for the standard connections as well as for the Platform Switching option (PS). They are not rotation-locked and are screw-retained in the upper inner thread of the Implants.

CAMLOG® Impression taking

Impression-taking of the CAMLOG® Implants is possible with impression posts, open or closed tray. Impression posts for Platform Switching (PS) are also an option. All impression-taking components are color-coded based on the Implant diameter. High-precision components ensure correct transfer of the intraoral situation. The antirotational mechanism is ensured by the CAMLOG® groove/cam geometry.

CAMLOG® Temporary abutments

Various abutments are available for the CAMLOG® Implant System for temporary prosthetic restorations. CAMLOG® Temporary abutments made of titanium alloy (Ti6Al4V ELI) are available in crown and bridge versions.

As an option, temporary restoration on CAMLOG® Implants can also be performed with temporary abutments made of PEEK (poly ether ether ketone). Also as option for Platform Switching (PS). The abutments can be used in immediate implantations or after exposing the gingiva.

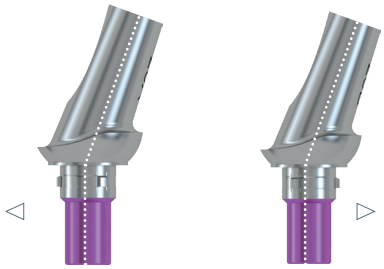
CAMLOG® Titanium bases CAD/CAM

CAMLOG® Titanium bases CAD/CAM are acting as a bonding basis for customized, Implant-supported dental restorations made of suitable materials. Reconstructions are fabricated with the aid of CAD/CAM techniques. CAMLOG® Titanium bases CAD/CAM are available in crown and bridge versions.
Optionally a Titanium base CAD/CAM crown PS is also available for Platform Switching.

CAMLOG® Esthomic® Abutments

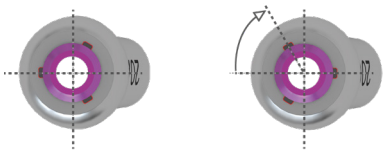
Anatomically preformed abutments allow for optimal stump design. The CAMLOG® Esthomic® Abutments are available both straight and angled with various gingival heights and with an oval anatomically pre-shaped shoulder profile. The angled Esthomic® Abutments are available in A and B versions differentiated by a cam offset of 60°. This results in six prosthetic-oriented rotating positions and allows perfect prosthetic alignment of the axes.

CAMLOG® Esthomic® Abutment cam alignment



Type A
Cam alignment against the angle

Type B
Cam alignment in direction of the angle



Type A

Type B
Cams with 60° offset

CAMLOG® Gold-plastic abutment

The CAMLOG® Gold-plastic abutment can be used with the cast-on technique to fabricate a multitude of customized Implant restorations, such as single crowns, mesostructures for cementable bridge restorations and primary abutments for bridging Implant axis divergences in the double crown technique.

CAMLOG® Logfit® Abutments

The CAMLOG® Logfit® Prosthetic System enables the fabrication of cementable crown and bridge restorations. The Logfit® Prosthetic System consists of prefabricated components precisely matched to one another and thus standardizes the clinical and technical procedure. The result is a lower workload for the practice and the dental laboratory.

CAMLOG® Universal and telescope abutments

CAMLOG® Universal and telescope abutments can be used for individually fabricated cementable crown and bridge restorations and for double crown restorations. The universal abutment is also available for optional Platform Switching (PS). The abutments are made of titanium alloy and can be custom trimmed.

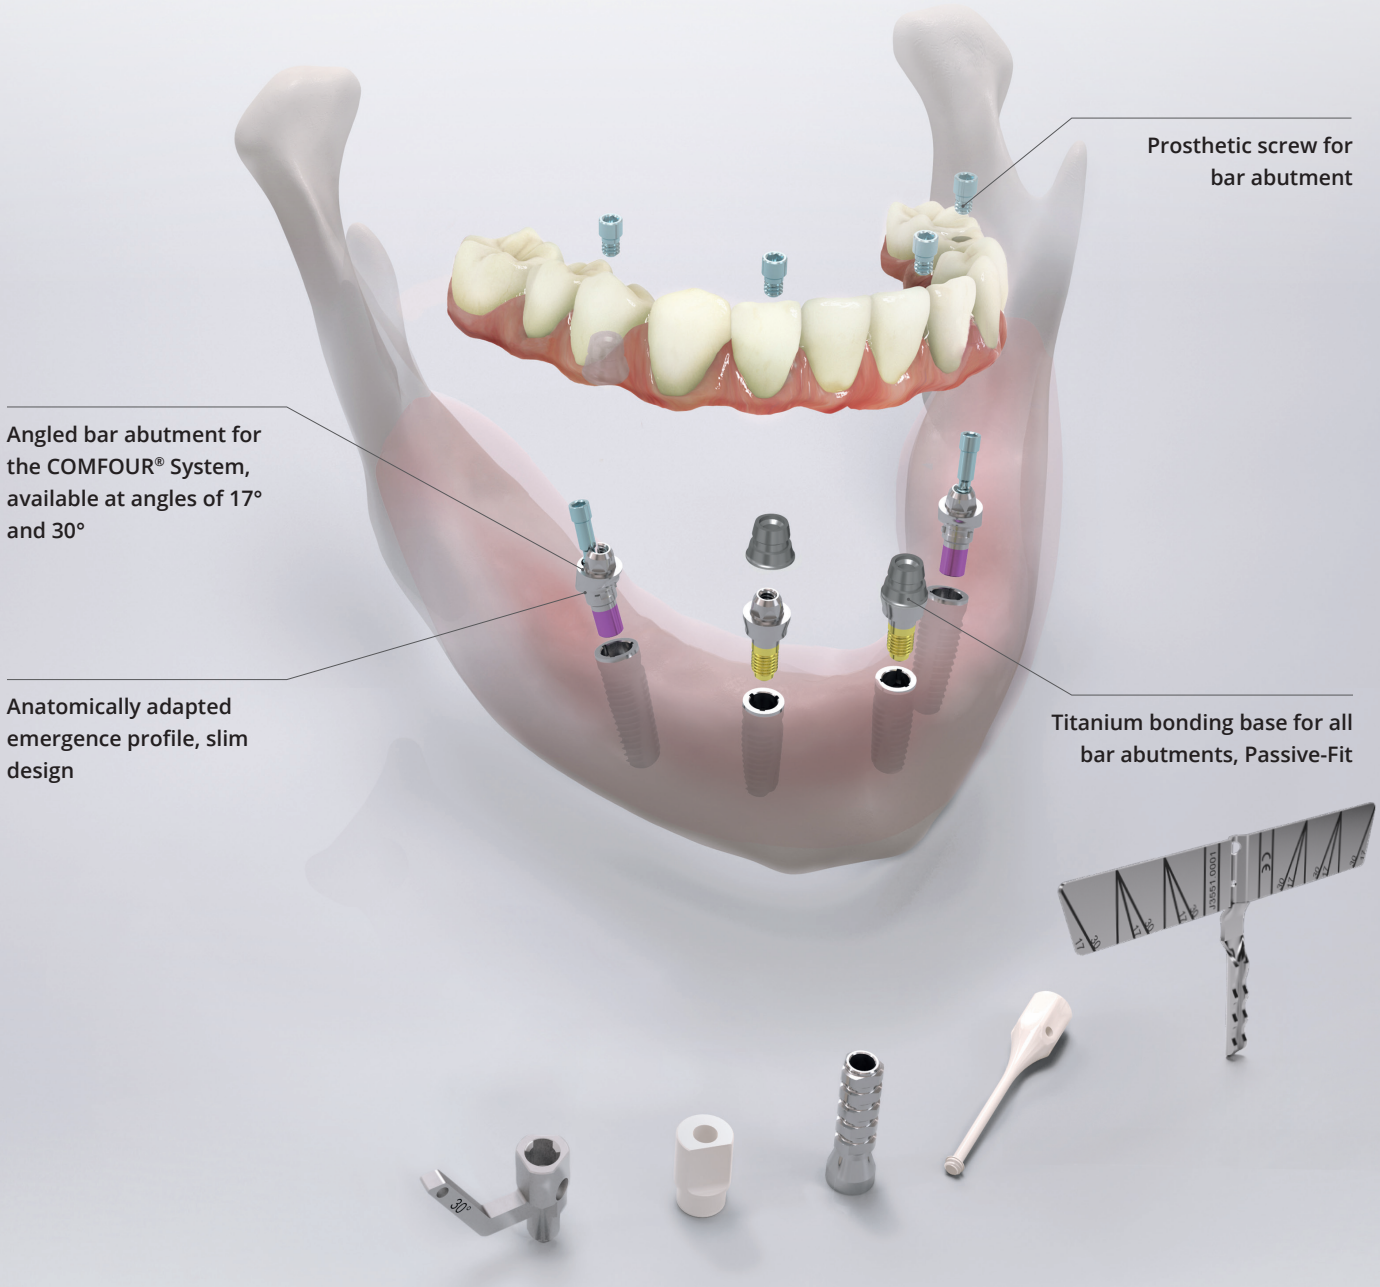
CAMLOG® Ball, Locator® and straight bar abutments

Ball, Locator® and straight bar abutments are available for the CAMLOG® Implant System. These differ from the abutments with abutment screws in the apical region through different connection designs. Ball, Locator® and straight bar abutments are manufactured as single pieces with a thread in the apical region which engages with the upper inner thread of the CAMLOG® Implant. These abutments are screwed into the CAMLOG® Implant using the corresponding insertion tools.

COMFOUR® System

Occlusally screw-retained restorations are state-of-the-art. With the COMFOUR® System, edentulous patients are given the option of immediate, comfortable and permanent dentures based on four or six Implants as a rule – and thus a considerable gain in quality of life. But clinicians too can look forward to considerably greater comfort and freedom. COMFOUR® offers several treatment concepts. In addition to occlusally screw-retained crowns and bridges for immediate and delayed restorations, the multi-optional system also permits bar restorations on straight and angled bar abutments.

COMFOUR® offers a wide range of options to master the challenges in practice routine easier and with less time in future. Next to its versatility, the COMFOUR® Prosthetic system excels through its slim design in particular. All components are of delicate and low design, which simplifies prosthetic restorations considerably for dentists and dental technicians. In addition, a number of technical highlights ensure that COMFOUR® is not simply just a name, but also a program – for users and patients alike.



COMFOUR® offers a large selection of options to manage the requirements of your practice. Easier and more time-saving.

Digital service

Individually CAD/CAM fabricated prosthetics, scanning and design services, 3D Implant planning, printed drilling templates and jaw models are available from Camlog through our DEDICAM® Service Division. Personal support with the accustomed competence of our employees as well as processes optimized right down to the finest detail ensure a high degree of certainty of results with the greatest possible individual freedom. Extensive libraries for the open CAD systems from 3Shape, exocad and Dental Wings are available for Implant-supported restorations. Discover your options and start your digital future with DEDICAM®.
DEDICAM® Services are not available in all countries. Please ask your local Camlog representative for details.

SCREW-LINE

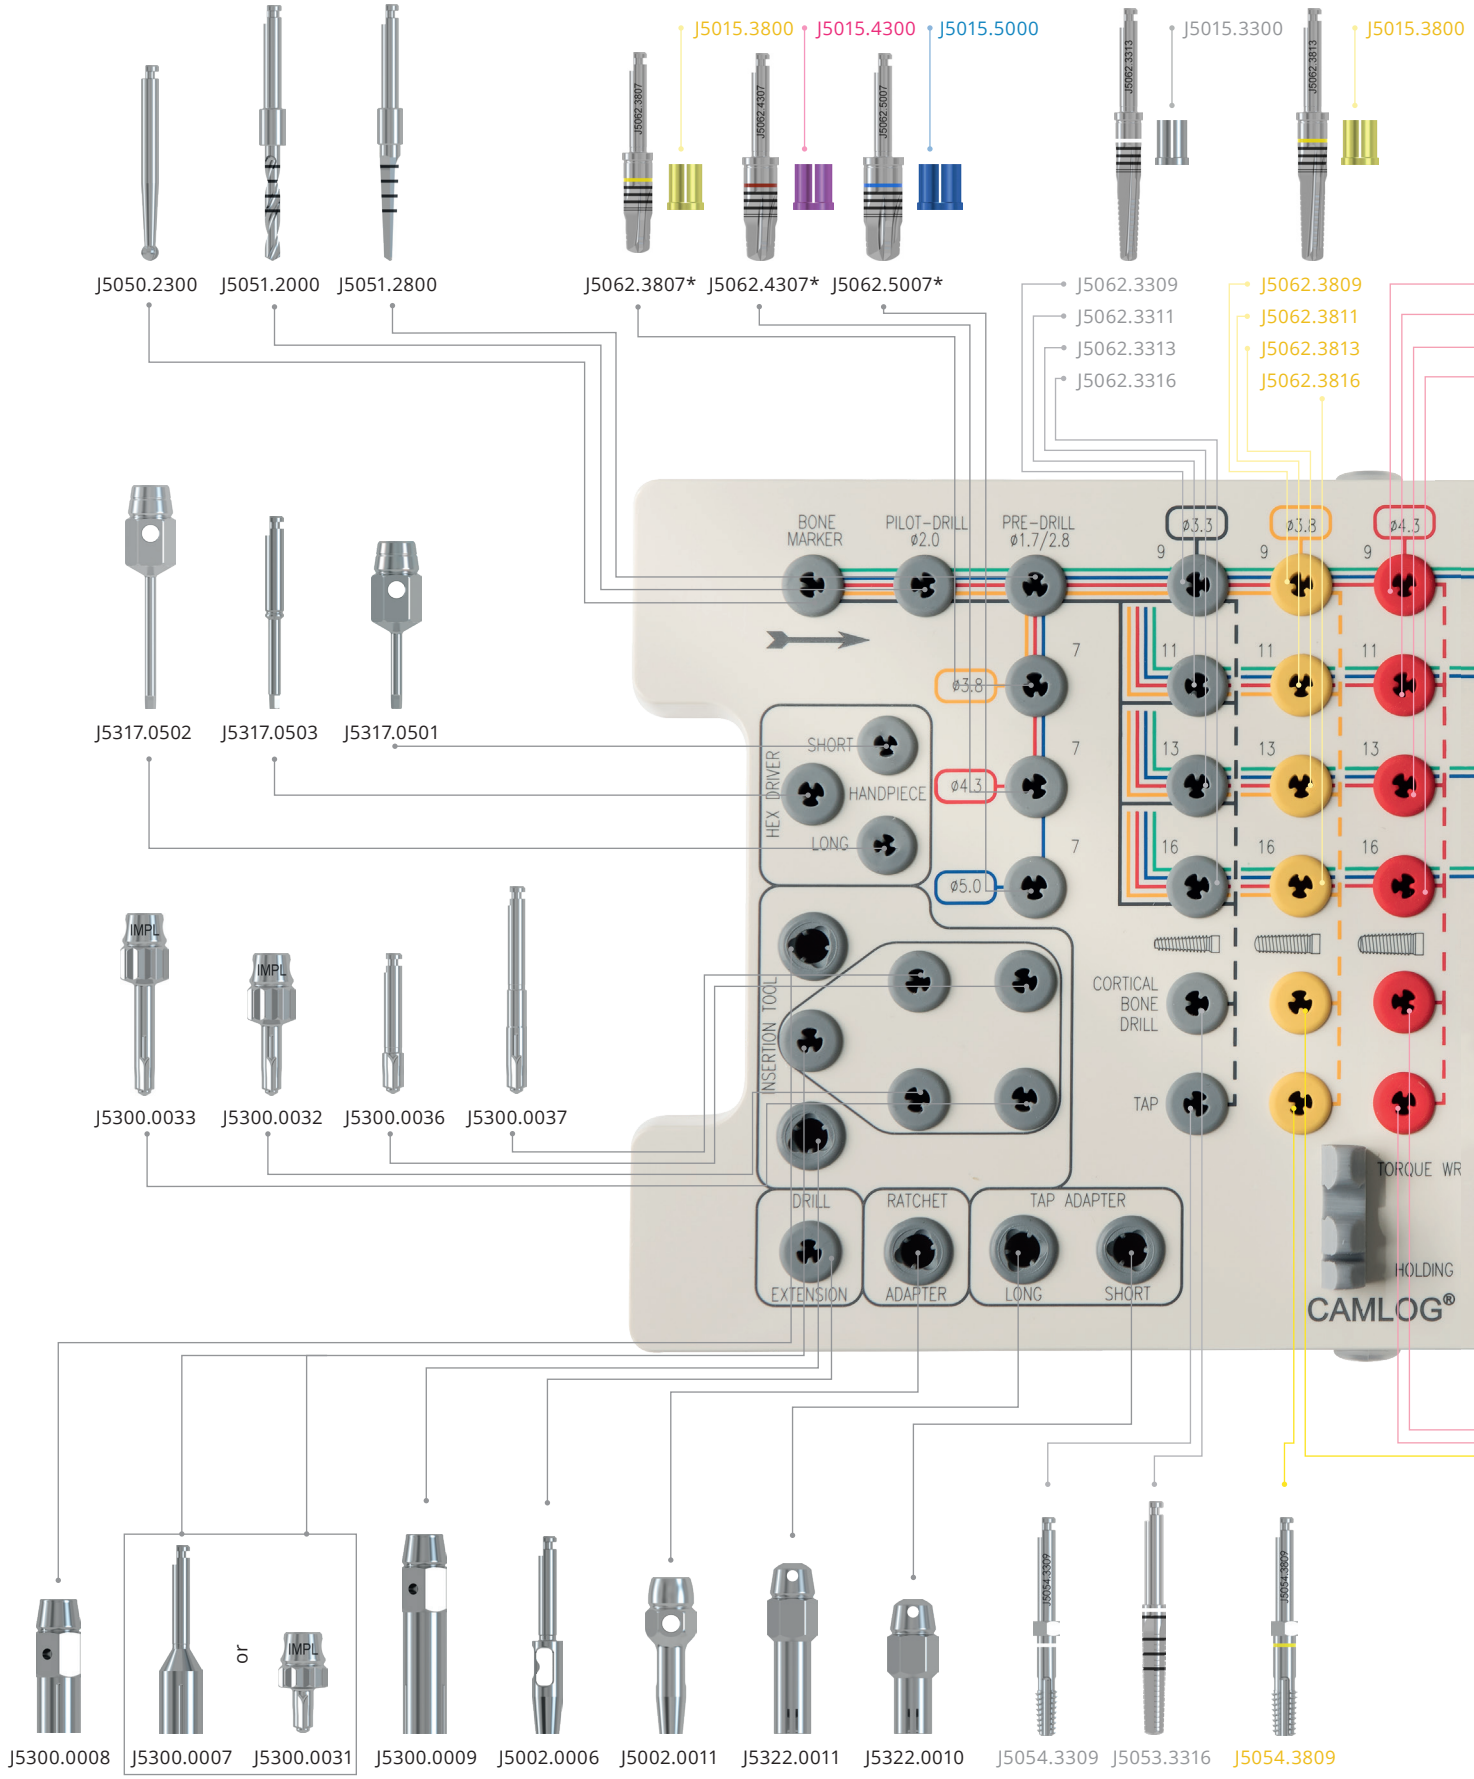
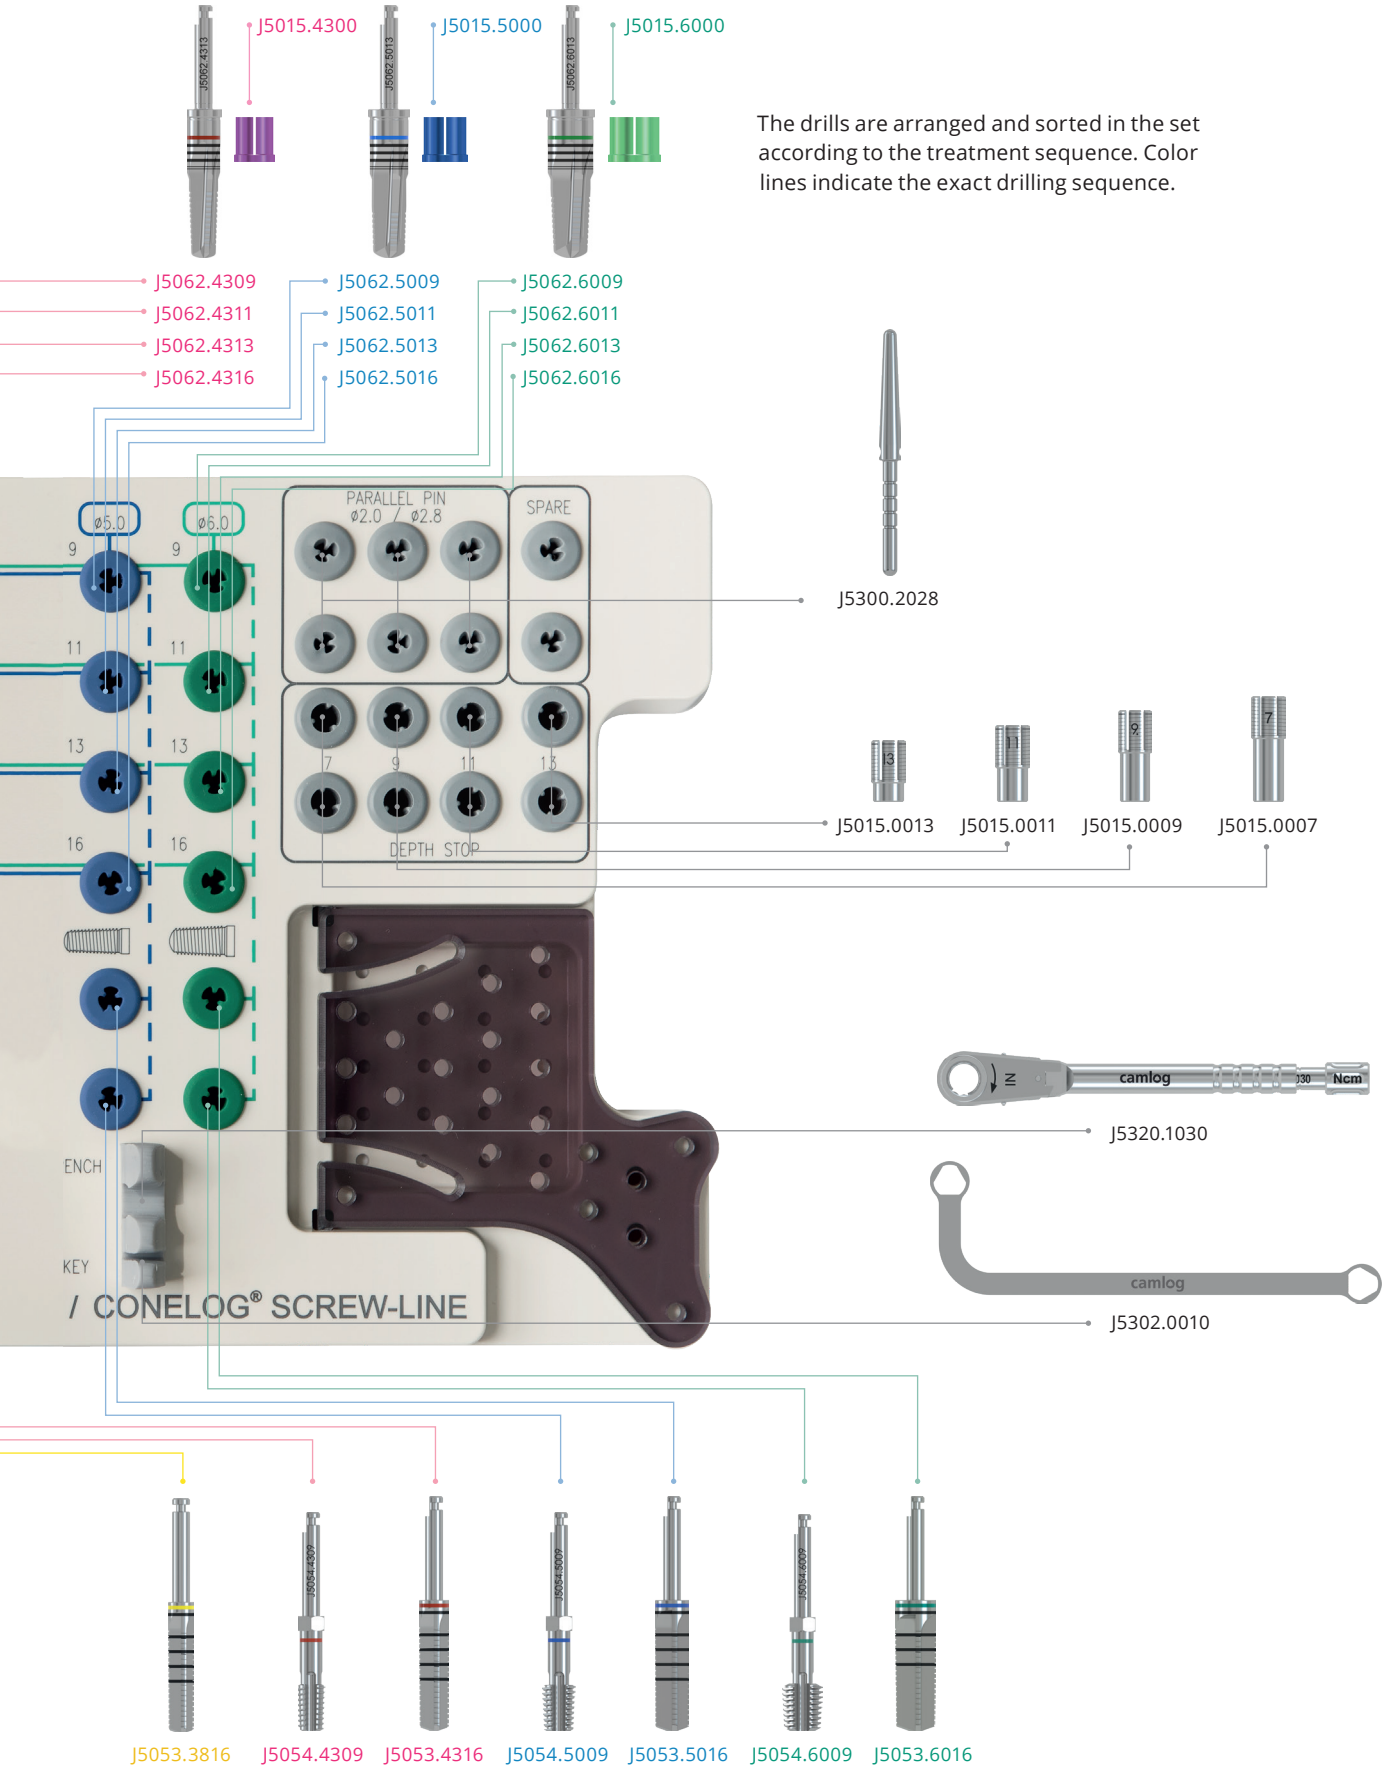
Surgery set CAMLOG®/CONELOG®



* only for CONELOG® SCREW-LINE Implants length 7 mm



The drills are arranged and sorted in the set according to the treatment sequence. Color lines indicate the exact drilling sequence.

SCREW-LINE

Surgery set

	Article	Art. No.
	**Surgery set CAMLOG®/CONELOG® SCREW-LINE** contains all necessary surgical instruments sorted by color code, incl. torque wrench and holding key for insertion post (drills and taps for Ø 6.0 mm are not included)	J5300.0063
	**Surgery tray CAMLOG®/CONELOG® SCREW-LINE** without content	J5300.8916
	**Surgery wash tray CAMLOG®/CONELOG® SCREW-LINE** incl. pattern, without content	J5300.8968
	**Pattern for surgery wash tray CAMLOG®/CONELOG® SCREW-LINE** **Material** Aluminum	J5300.1068

Preparation of the Implant bed for CAMLOG® SCREW-LINE Implants and for CONELOG® SCREW-LINE Implants is performed with identical instruments.

** only for use with CAMLOG® PROGRESSIVE-LINE Implants (with snap-in insertion post) with Art. No. K1076.xxxx and CAMLOG® SCREW-LINE Implants with Art. No. K1042.xxxx, K1046.xxxx, K1052.xxxx and K1056.xxxx.

General surgical instruments

	Article	Art. No.	Ø	Dimension
	**Holding key** **for insertion post** **Material** Stainless steel	J5302.0010	-	-
	**CAMLOG® Adapter** **for screw Implants, short** for CAMLOG® Implants **Material** Stainless steel	K5302.3311	3.3 mm	29.8 mm
		K5302.3811	3.8 mm	
		K5302.4311	4.3 mm	
		K5302.6011	5.0 mm	
			6.0 mm	
	**CAMLOG® Adapter** **for screw Implants, long** for CAMLOG® Implants **Material** Stainless steel	K5302.3310	3.3 mm	34.8 mm
		K5302.3810	3.8 mm	
		K5302.4310	4.3 mm	
	**Holding sleeve** **for screw Implants** color-coded **Material** Titanium alloy	J5302.3300	3.3 mm	-
		J5302.3800	3.8 mm	
		J5302.4300	4.3 mm	
		J5302.5000	5.0 mm	
		J5302.6000	6.0 mm	
	**Screwdriver** hex, extra short, manual/wrench **Material** Stainless steel	J5317.0510	-	14.5 mm
	**Screwdriver** hex, short, manual/wrench **Material** Stainless steel	J5317.0501	-	22.5 mm
	**Screwdriver** hex, long, manual/wrench **Material** Stainless steel	J5317.0502	-	30.3 mm

	Article	Art. No.	Dimension
	**Screwdriver** hex, short, ISO shaft **Material** Stainless steel	J5317.0504	18.0 mm
	**Screwdriver** hex, long, ISO shaft **Material** Stainless steel	J5317.0503	26.0 mm
	**Manual screwdriver, hex** without wrench head connection **Material** Stainless steel	J5317.0511	23.0 mm
	**Cleaning needle** for instructments with internal irrigation **Material** Stainless steel	J5002.0012	-
	**Cleaning cannula** for drills with internal irrigation **Material** Stainless steel	J5002.0020	-

SCREW-LINE

Osteotomy set

	Article	Art. No.	Ø
	**Osteotomy set CAMLOG®/CONELOG® SCREW-LINE** straight convex **Material** Stainless steel	J5418.0020	-
	**Pre-Osteotome SCREW-LINE** straight convex **Material** Stainless steel	J5417.2800*	1.7 – 2.8 mm
	**Osteotome SCREW-LINE** straight convex **Material** Stainless steel	J5418.3300*	3.3 mm
		J5418.3800*	3.8 mm
		J5418.4300*	4.3 mm
		J5418.5000*	5.0 mm
		J5418.6000*	6.0 mm

* These products are also included in the osteotomy set CAMLOG®/CONELOG® SCREW-LINE straight convex.

	Article	Art. No.	Ø
	**Osteotomy set CAMLOG®/CONELOG® SCREW-LINE** angled convex **Material** Stainless steel	J5418.0030	-
	**Pre-Osteotome SCREW-LINE** straight convex **Material** Stainless steel	J5417.2800*	1.7 – 2.8 mm
	**Osteotome SCREW-LINE** angled convex **Material** Stainless steel	J5418.3310*	3.3 mm
		J5418.3810*	3.8 mm
		J5418.4310*	4.3 mm
		J5418.5010*	5.0 mm
		J5418.6010*	6.0 mm

* These products are also included in the osteotomy set CAMLOG®/CONELOG® SCREW-LINE angled convex.

SCREW-LINE

Osteotomy set

	Article	Art. No.	Ø
	**Osteotomy set CAMLOG®/CONELOG® SCREW-LINE** straight concave **Material** Stainless steel	J5420.0020	-
	**Pre-Osteotome SCREW-LINE** straight concave **Material** Stainless steel	J5419.2800*	1.7 – 2.8 mm
	**Osteotome SCREW-LINE** straight concave **Material** Stainless steel	J5420.3300*	3.3 mm
		J5420.3800*	3.8 mm
		J5420.4300*	4.3 mm
		J5420.5000*	5.0 mm
		J5420.6000*	6.0 mm

* These products are also included in the osteotomy set CAMLOG®/CONELOG® SCREW-LINE straight concave.

	Article	Art. No.	Ø
	**Osteotomy set CAMLOG®/CONELOG® SCREW-LINE** angled concave **Material** Stainless steel	J5420.0030	-
	**Pre-Osteotome SCREW-LINE** straight concave **Material** Stainless steel	J5419.2800*	1.7 – 2.8 mm
	**Osteotome SCREW-LINE** angled concave **Material** Stainless steel	J5420.3310*	3.3 mm
		J5420.3810*	3.8 mm
		J5420.4310*	4.3 mm
		J5420.5010*	5.0 mm
		J5420.6010*	6.0 mm

* These products are also included in the osteotomy set CAMLOG®/CONELOG® SCREW-LINE angled concave.

ALTApin set

	Article	Art. No.
	**ALTApin set** Membrane fixation system, resterilizable **Material** Plastic/Titanium alloy/Stainless steel	M5600.0110
	**ALTApin Tray** (without content) **Material** Plastic	M5600.0210
	**ALTApin applicator, straight** incl. activator **Material** Stainless steel	M5100.0010*
	**ALTApin applicator, angled 90˚** incl. activator **Material** Stainless steel	M5100.0030
	**ALTApin applicator, straight, work element** incl. activator **Material** Stainless steel	M5200.0010

* These products are included in the ALTApin set.

	Article	Art. No.
	**ALTApin pricker** **Material** Stainless steel	M5100.0050*
	**ALTApin membrane fixator** **Material** Stainless steel	M5100.0070*
	**ALTApin surgery mallet** **Material** Stainless steel/POM	M5100.0100
	**ALTApin single patient drill, ISO shaft** **Material** Stainless steel	M5500.0050

* These products are included in the ALTApin set.

ALTApin set

	Article	Art. No.
	**ALTApin pricker, insert** **Material** Stainless steel	M5200.0055*
	**ALTApin magazine** 7 titanium pins, sterile, 1 unit **Material** Titanium alloy	M1000.0050*
	**ALTApin magazine** 7 titanium pins, sterile, 3 units **Material** Titanium alloy	M1000.0100

* These products are included in the ALTApin set.

Cover screws

	Article	Art. No.	Ø
	**CAMLOG® Implant cover screw** **Material** Titanium alloy	J2019.3300	3.3 mm
		J2019.3800	3.8 mm
		J2019.4300	4.3 mm
		J2019.5000	5.0 mm

PS 	**CAMLOG® Titanium base CAD/CAM PS for Platform Switching, crown** bonding base for individual CAD/CAM fabricated dental prosthesis, incl. abutment screw and bonding aid (POM) **Material** Titanium alloy/POM	K2210.3808	3.8 mm	0.8 mm
		K2210.4308	4.3 mm	
		K2210.5008	5.0 mm	

The geometries of the CAMLOG® Titanium bases CAD/CAM are available as a CAD library for leading dental CAD systems. The libraries are available for free download at: www.camlog.com/en/media-center/cad-libraries.

* only for crown restorations in the region of the upper lateral and lower lateral and central incisors

DEDICAM® CAD/CAM prosthetics from Camlog
Find out more about DEDICAM® products at your appropriate Camlog country representative.

	Article	Art. No.	Ø
	**CAMLOG® Modeling aids for CAMLOG® Titanium bases CAD/CAM** burn-out, for fabricating mesostructures and crowns **Material** POM	J2244.3302	3.3 mm
		J2244.3802	3.8 mm
		J2244.4302	4.3 mm
		J2244.5002	5.0 mm
		J2244.6002	6.0 mm
	**CAMLOG® Scanbodies**** for optical, 3-dimensional localization of CAMLOG® Implants in the mouth or CAMLOG® Lab analogs in the working model, incl. abutment screw, sterile Not compatible with the CEREC and inLab systems from Sirona® **Material** PEEK	K2610.3310	3.3 mm
		K2610.3810*	3.8 mm
		K2610.4310*	4.3 mm
		K2610.6010*	5.0 mm
			6.0 mm
	**CAMLOG® ScanPosts for Sirona® Scanbody** for digital recording of the CAMLOG® Implant or lab analog position and for further processing in the Sirona® CEREC and inLab systems, incl. abutment screw **Material** Titanium alloy	K2620.3306	3.3 mm
		K2620.3806*	3.8 mm
		K2620.4306*	4.3 mm
		K2620.5006*	5.0 mm
		K2620.6006*	6.0 mm

** Please check whether the CAMLOG® Scanbody is available in the CAD software used. CAD libraries for selected CAMLOG® Prosthetic components are available for free download at:
www.camlog.com/en/media-center/cad-libraries.

Matching Sirona® Scanbodies size S for CAMLOG® ScanPosts and CAMLOG® Titanium base CAD/CAM crown with Ø 3.3/3.8/4.3 mm:
For Omnicam®: Article number 6431311 For Bluecam®: Article number 6431295
Matching Sirona® Scanbodies size L for CAMLOG® ScanPosts and CAMLOG® Titanium base CAD/CAM crown with Ø 5.0/6.0 mm:
For Omnicam®: Article number 6431329 For Bluecam®: Article number 6431303
Sirona® Scanbodies are available from Dentsply Sirona®.

* can also be used for Platform Switching

CAM titanium blanks

Milling production process of individualized one-piece abutments and healing caps by CAD/CAM technology

	Article	Art. No.	Ø
	**CAMLOG® CAM titanium blank, type IAC*** Ø 12 mm, length 12.5 mm (2 units), sent with 2 separate packed abutment screws **Material** Titanium alloy	K2411.3313	3.3 mm
		K2411.3813	3.8 mm
		K2411.4313	4.3 mm
		K2411.6013	5.0 mm
			6.0 mm
	**CAMLOG® CAM titanium blank, type ME**** Ø 12 mm, length 20 mm (2 units), sent with 2 separate packed abutment screws **Material** Titanium alloy	K2421.3320	3.3 mm
		K2421.3820	3.8 mm
		K2421.4320	4.3 mm
		K2421.5020	5.0 mm
		K2421.6020	6.0 mm

Accessories for CAM titanium blanks, type IAC

	Article	Art. No.	Ø
	**CAMLOG® Collet for CAM blank, type IAC*** Ø 6 mm, length 17 mm, incl. 2 fixing screws for CAM blank, type IAC **Material** Stainless steel	K3720.3300	3.3 mm
		K3720.3800	3.8 mm
		K3720.4300	4.3 mm
		K3720.6000	5.0 mm
			6.0 mm

Type IAC*
For the milling process, the CAM titanium blank type IAC is fixated to the Implant-abutment connection via the CAMLOG® Collet for CAM blanks. The machine-specific holders and adapters for the collet as well as the milling strategies are to be provided by the user.

Type ME**
For the milling process, the CAM titanium blank type ME is fixated with the front-facing groove of its cylindrical section via a milling holder for PreFace® Abutments from Medentika®. These milling holders are available for selected machines from the particular machine manufacturer.
The CAM titanium blanks require product specific CAM librarys which are available on request for selected CAM softwares from the software provider.

The geometries of the CAMLOG® CAM titanium blanks are available as a CAD library for leading dental CAD systems. The libraries are available for free download at:
www.camlog.com/en/media-center/cad-libraries.

Medentika® and Preface® are registered trademarks of Medentika GmbH, D-Hügelsheim.

Universal abutments

Cemented crown and bridge restorations

	Article	Art. No.	Ø	Dimension
	**CAMLOG® Universal abutments** preparable, incl. abutment screw **Material** Titanium alloy	K2211.3300	3.3 mm*	-
		K2211.3800	3.8 mm	
		K2211.4300	4.3 mm	
		K2211.5000	5.0 mm	
		K2211.6000	6.0 mm	
PS 	**CAMLOG® Universal abutments PS for Platform Switching** preparable, incl. abutment screw **Material** Titanium alloy	K2201.3800	3.8 mm	-
		K2201.4300	4.3 mm	
		K2201.5000	5.0 mm	
		K2201.6000	6.0 mm	

Gold-plastic abutment

Cemented crown and bridge restorations

	Article	Art. No.	Ø	Noble metal weight
	**CAMLOG® Gold-plastic abutment** cast-on, incl. abutment screw **Material** Cast-on gold alloy/POM	K2246.3300	3.3 mm*	ca. 0.42 g
		K2246.3800	3.8 mm	ca. 0.46 g
		K2246.4300	4.3 mm	ca. 0.65 g
		K2246.5000	5.0 mm	ca. 0.81 g
		K2246.6000	6.0 mm	ca. 0.89 g

* only for crown restorations in the region of the upper lateral and lower lateral and central incisors (Ø 3.3 mm not for double crown restorations)

Logfit® Prosthetic system

Cemented crown and bridge restorations

	Article	Art. No.	Ø	GH
	**CAMLOG® Logfit® Abutments** incl. abutment screw **Material** Titanium alloy	K2550.3808	3.8 mm	0.8 mm

	Color	white
	Liquidus	1490 °C
	Solidus	1400 °C
	Coefficient of thermal expansion (25 – 500°C)	12.5 µm/m· °C
	Coefficient of thermal expansion (25 – 600°C)	12.6 µm/m· °C
	E-Modul	136 GPa
Mechanical properties	Hardness HV5	hardened 700 °C/30 min. 210
	0.2 % Elongation limit	450 – 570 MPa
	Elongation at break	min. 10 %
	Tensile strength MPa	530 – 650

Solderable gold alloy base for bar abutment		
Properties		
Chemical structure (in %)	Au	68.60
	Pt	2.45
	Ag	11.85
	Pd	3.95
	Cu	10.60
	Zn	2.50
	Ir	0.05
	Rh	-
	Ru	-
Physical properties	Color	yellow
	Melting range	880 – 940 °C
Mechanical properties	Hardness	
	annealed HV5	175
	hardened HV5	275
	self hardened HV5	240

Further documentation

Further information on the CAMLOG® Products can be found in the following documents:

- CAMLOG® Product catalog
- CAMLOG® Working instructions
- CAMLOG® Instruction for use
- Preparation instructions
- Camlog literature overview
- Camlog and science

The documents are available from the local Camlog representative.
