

CORiTEC  
**ione scan**

# ione scan

## Your support for quick scanning!

The CORiTEC *ione scan* is designed and developed to produce high-quality digital intraoral scans or models for dental restoration or analysis.

To ensure accurate and fast scanning, the CORiTEC *ione scan* is one of the smallest ones worldwide.

## The perfect symbiosis

The CORiTEC *ione scan* merges perfectly with our CORiTEC one Chairside series to form a unified workflow that makes dental offices, practice laboratories and clinics work even more efficient and easier.

The CORiTEC *ione scan* is open to be connected to all other CORiTEC machines and can be purchased separately.

## Highlights CORiTEC *ione scan*

**Compact, glossy and smooth design**

**No software update and support fees**

**One of the smallest and the lightest scanners worldwide**

**Perfectly matched open system in practice**

**Well-ergonomic design by rotating tip**

**Perfect price performance ratio**

**High precision and accuracy scan**

**Compatible with all CORiTEC machine systems**

# Fast | Ergonomic | Intuitive

The intuitive software and easy-to-use interface (available in more than 10 languages) provide a quick learning curve to support you to meet all your restorative, orthodontic and implantology needs.
